First paragraph of the results section in Guerao et al. (2011):

The CL/ANSL ratio is different in *M. squinado* in relation to other European species of the genus *Maja*. Thus, the CL/ANSL ratio is <3 in *M. brachydactyla* (CL/ANSL=2.52±0.1), *M. crispata* (CL/ANSL=2.01±0.1) and *M. goltziana* (L/ANSL=2.5±0.06), but >3 in *M. squinado* (CL/ANSL=3.24±0.12)...

is wrong and should be replaced by:
